Last name: O'Brien

Organization: Project Eleven Hundred

Title: Executive Director

Comments: This comment page at <https://cara.ecosystem-management.org/Public/CommentInput?project=59899> says that comments on the Forestwide Prescribed Fire Restoration Project #59899 are due May 14, 2021. The April 14, 2021 legal notice in the Richfield Reaper says comments are due April 28 2021. The NEPA process is wholly compromised by giving a 2-week comment period for a forestwide EA for prescribed burning on as many as 40,000 acres in a year in sagebrush/grass/forbs, mountain brush, oak, ponderosa pine, pinyon, juniper, aspen, and/or mixed conifer. The comment period should be May 14, 2021, and the proposed project needs to be an EIS due to potential for multiple significant impacts. Further comments to follow.
