Title:

Comments: My family is originally from California..(40 years) we have been fishing Hot Creek for over 30 years and have enjoyed a few fishing pack trips in this area..we have also watched the mining TV show and seen the destruction that gold mining does to the environment..and the destruction of the natural streams...we can not phantom that anyone is considering this..the YEARS that it would take for this area to recover we and our grandchildren would never see them recover..I have seen such destruction with motorcycle parks in the San Bernardino mountains..this needs serious evaluation before issuing any permits. T
