Comments: Many times I have had the thrill of seeing wild horses while exploring Arizona. Seeing the majestic wild horses is a sight that is always the highlight of my exploring.

I am begging you to change your solution to a more human solution. It's time to halt the primitive solutions to modern-day issues. Darting the horses with birth control has proven to be successful in your own state. It is safe, cost effective, and a more natural way to solve the problem with the least stress on the horses. It's a win for everyone. Please reconsider your plans for the sake of the horses. Arizona has the opportunity to lead the way for future. Be a leader and be proactive, not reactive.
