Comments: John Muir would be sickened by this disgusting mining proposal in the Eastern Sierra Nevada. This area is an American natural treasure. I stand with all those who oppose this mine. This scheme is so a foreign business can destroy a spectacular natural area on the backs of Americans for their special interests, a story played out in the past over and over again. Tell Kore Mining no, and send them back to Canada for their precious gold. Inyo national forest is too spectacular for something environmentally risky like this. Wrong place, wrong idea. Thank you!
