Comments: Message

I will keep this simple altho there are many comments to be made. Please make the ethical, wise, & right decision for the wilderness, public lands, & wildlife. And stop the Forest Service's proposed Rangeland Management Directives. Wilderness is for wildlife, not for farmers & ranchers who want their animals to graze on public land. Slowly but surely, mankind & the government are driving back our wilderness areas for farming, drilling, oil exploration, etc. We must stop. When our wildlife & its habitat are gone, they are gone forever
