Comments: I feel that you are making a big mistake culling the Heber herd of wild horses. if you leave it at 50 that is not enough population to maintain a diversified healthy herd. it will have too much inbreeding to survive but perhaps that really is your goal.

if you check out how the Salt River horses are handled i think it would be beneficial to your department and certainly beneficial to the Heber herd.

i feel that your intentions are not humane.

thank you.
