Comments: TERRITORY MANAGEMENT PLAN FOR THE HEBER WILD HORSES

These Horses have been the target of brutal shootings in the Forest that have left 28 DEAD since 2018. ENOUGH IS ENOUGH. The depraved cruelty to, the unconscionable disrespect for other Living Beings - our Wild Horses - who have every right to live. HOW COULD YOU. We want better treatment, a fairer plan, and ultimately, justice for our Heber Wild Horses.

*The plan sets the AML extremely low at just 50-104 Wild Horses on 19,700 acres. Even at high AML, that's one Horse for every 394 acres! This range is far too low to maintain a self-sustaining, genetically viable population of Wild Horses in the Territory.

*With the new AML, at low AML, Wild Horses are provided just 600 Animal Unit Months while cattle are permitted 5,730 Animal Unit Months to graze within the Territory. (Something is very wrong here). Thus, the Forest Service must adjust livestock use in the Territory in order to give Wild Horses their fair share of the resource.

*The last population survey in the Territory found that many of the Horses were outside of the Territory boundary. Instead of immediate removal, the Forest Service should make every effort to RELOCATE those Horses within the boundary.

*The plan provides for fertility control to be used to control the population growth rate of the horses in the Territory. The Forest Service must consider how:
?(1) the use of these options will impact the health of the herd when the population is maintained at such a small population.
?(2) PZP has over 30 years of proven efficacy and should be the preferred tool for use in the Territory.
?(3) IUDs have NOT been proven humane or effective in wild, free-roaming herds and should be eliminated from further analysis.

*If removals must occur within the Territory, they should be done exclusively through bait-trapping and over time, to meet adoption demand and ensure that the Forest Service does not add to the thousands of Wild Horses already in off-range holding facilities across the country.

*Finally, the Heber Wild Horses have been the target of illegal hunting since 2018. The Forest Service must work harder to protect these federally protected Wild Horses from harm and to find the person(s) responsible.

REMEMBER, the History of Mankind is carried on the BACK of the Horse - we MUST give deserved reverence to our Horses - Horses have given us much and we Humans have benefited greatly.
