Comments: My husband and I are very much opposed to removing or killing the Heber wild horses which were lawfully protected in 1971 by the WFRBA by Congress. They were allowed to graze on over 2 million acres but somehow the Black Mesa Ranger District and the ASNF changed it to 19,700 acres which is illegal and yet they allow thousands of cattle there which are known to destroy and pollute their habitat. Why aren't the vicious hunters who are murdering so many of the horses been arrested. A local person was very frightened so I believe it is an area person. Have you saved the bullets so those vicious people can be arrested. If the horse population is reduced so much they won't be genetically stable. Please please protect our beautiful wild horses.
