Comments: I object to moving these wild horses from their home of this forest, their natural territory for over 150 years. There are numerous reasons to keep these animals where they are currently living, but to put it simple terms...would you want someone to come pick you up and move you from the place you have lived your entire life? Nature in our world is getting smaller by the second preserving these animals in their natural habitat is important. Please keep them in their home. Thank you
