Comments: As a mother and grandmother, I believe it is our duty to protect and preserve wildlife and our precious natural resources for all future generations. As a person of faith, I also feel a deep responsibility as a Steward for all of God's Divine Creation. That responsibility should always come before politics or profit.

So I am contacting you on behalf of the Heber Wild horses. From what I have read, they are doing just fine without anyone's interference and will continue to benefit from just being left alone.

I also understand that any interference would violate the Wild Free-Roaming Horses and Burros Act of 1971. So I have to wonder exactly why you wish to limit their numbers. I just hope that it is not on behalf of the cattle industry or any similar organization. I have read of the BLM and other federal groups being pressured by the cattle industry, hunters and corporations to attack and decimate *our* nation's wildlife for their financial benefit.

Please forgive me for being cynical, I am sure that is not the case here. Regardless, I urge you to please leave the Heber Wild horses in peace.
