Title:

Comments: We object to the removal of this herd of wild horses from their current living location. They deserve to be protected and they deserve to live in this forest where they have resided for at least 150 years. What would you think/feel if, out of the blue, someone or some group relocated you and your families against your will from the (presumed) comfortable environment you now reside ? It would be inhumane ! Please understand the parallel point. Please do not do it ! Thank you in advance for making a caring, sensitive & humane decision !!!

Sincerely, Norm & Nancy Santangelo
