Data Submitted (UTC 11): 4/21/2021 11:09:24 PM
First name: Jacqueline
Last name: Klotz
Organization:
Title:
Comments: I respectfully demand that this herd not be removed from their current habitat. This herd has been studied and there is proof that they self-regulate their own fertility and the increase in population as been proven to be 3%, not the 20% reported by the BLM (Bureau of Land Management). Please provide protection so that this herd can remain in their current habitat.
