Title:

Comments: I demand protection for this herd of wild horses, that have roamed FREE for all these years in this habitat. I demand that they continue to be protected as such. These wild horses are NO threat to anyone. I believe that the population of this herd has been grossly over-exaggerated, and the actual population is 3% NOT 20% as was reported by the Bureau of Land Management. I also demand that these wild horses, remain free and untouched and protected on the land that they have roamed for decades.
