First name: Erika

Last name: Sharp

Organization:

Title:

Comments: These horses have lived for 150 years on this land with no issue. Perhaps it is human intervention and encroachment that is the issue. There is no sign of over population or danger to humans if they are left where they are. Please do the correct thing and leave these animals in their home. This land is there to support both human and animal life and we do not need to expand to every parcel of land in the country.
