Title:

Comments: I urge you not to remove the wild horses from their current range of habitat. It is imperative that they are protected. Removing the wild horses will cause more harm than good. They have been free for over a hundred and fifty years and why remove them now. Wildlife should be protected not harmed. they are not over populated as reported. PLEASE LET THE WILD HORSES REMAIN FREE IN THEIR CURRENT HABITAT. America's wild horses should be protected and preserved on our public lands for now and for generations to come. Protect wildlife - stop destroying it!

Thank you.
