First name: Lonni

Last name: Mowan

Organization:

Title:

Comments: The Heber Horses have been around since 1907.

They are a treasure to this Apache Sitgreaves Forest.

The intention to keep only 24-50 horses would not leave the herd

Unfortunately, genetically viable.

PZP has been a great tool in many areas of our country where

This medication has reduced pregnancy, has allowed

herds to remain viable without growth.

Humanly manage as other places have done please.
