Comments: How do you want to be remembered FS? There's more than enough divide in this country don't you think? The reasons we the people of Arizona are so against our beautiful and coveted Heber Wild Horse herd being decimated to unworkable numbers is simple. Your logic and facts behind your intentions is flawed. It's been analyzed by the most prestigious wild horse organizations in the world and it's deemed unanimously dangerous toward the overall successful future of the entire Heber herd. I'm not going to run through your points here. SRWHMG for one has expressed them openly and plainly. You know their recommendations. So I'm simply asking you how do you want to be remembered? The people of Arizona love those horses more than anything else you've to offer. They are the living breath of your wilderness. You have nothing else that's comparable in emotions than the safety of those horses for future generations. PZP. Will do the job. You have the room. We know it. No matter what happens you will be forever remembered. The question is how do you want to be remembered? Please consider my request. Thank you.
