Title:

Comments: Please reconsider any euthanizing or removing of any of the Heber Wild Horse herd. Please consider humanely managing them with PZP and allowing for a humane management group to step in and take control of this herd of wild horses in conjunction with the state of Arizona. Please take some advice from the Salt River Wild Horse Management Group and what they have accomplished with the Salt River Wild Horses. This herd can be humanely managed, it is proven in so many other wild horse habitats.
