Comments: It is quite evident by the slaughter of the family members of the Heber horse herd over the past few years that someone doesn't want them to exist. Culling or removing horses will cause further damage to this herd. They have been through enough already. I implore you to please leave these creatures in the only home they have known. They deserve to have peace and freedom. Please leave them be. There's enough land for cattle and horses. The horses are no more destructive to the environment than cattle. I respectfully ask that you consider leaving these beautiful souls in the only home they have ever known. They are supposed to be protected!!! Thank you.
