Comments: Hi--I am disheartened to hear these horses are once again subject to being removed or destroyed for simply existing on land in the name of "managing". It is a documented fact they do not reproduce at the rate of 20% claimed by the BLM but at a more natural rate of 3%. They also deal with plenty of predators and dangers on a day to day basis, let alone the havoc man doles out to them. I use the term "managing" in a negative way as being a Florida resident near the Everglades and Lake Okeechobee, we have been witnessing the debacle that "managing" the area by the Army Corp of Engineers and government over decades has wrought. PLEASE leave the horses alone. There is nothing more American or wonderful than seeing them wild and free on their home turf. Thank you on their behalf. Susan Roberts
