Comments: I am completely against and outraged that culling of wild horses is once again being proposed, this time for the Heber Wild horses. Arizona needs to remain true to its heritage and landscape. Part of the Wild West. In 2019 we spent 6 months traveling the US in an RV. We were horrified to see how many states no longer have geographic distinction. Identical shopping centers EVERYWHERE. Rural communities have bull dozers waiting to complete subdivisions. If Arizona doesn't remain part of the Wild West we will look just like Cleveland!!

Leave ALL wild horses to be managed by nature and or the humanity of volunteer management groups like the Salt River herd.

If we remove the icons of the Southwest like the wild horses then we might as well bull doze the Saguaro, the rock monuments all the icons of our homeland.

To me eliminating or culling the herd of wild horses sounds like A SOLUTION LOOKING FOR A PROBLEM! The horses ARE NOT A PROBLEM.
