Comments: Please don't remove the wild horses. When we are out there, we don't see an overpopulation of horses. We see God's beauty. The horses bring tourists to your area who go to local businesses to support them. I would not go there to see cattle grazing on the land so I would have no reason to go there and therefore not going there to support the local businesses. The wild horses are loved by a lot of people. It would be a crying shame if you took them away from them.
