Comments: Please respect the lives of the wild horses. They should not be dinner for some other country . They should be free and protected as the law was intended. Running horses and colts with aircraft is inhumane and terrifying to animals and their advocates. Ripping female organs from mares for birth control is barbaric and should be outlawed in this country. I am embarrassed to see this behavior recommended in this country by grown humane . It is unthinkable that anyone could I led see this as an option in America. You are treating horses as others treat elephants , rhino, apes. We should be an example not a participant in slaughter of wild animals.
