Comments: Regarding the Heber Wild Horse Territory Plan #18916:

This is a plead for the protection of the wild Heber horses and their precious habitat. For at least 150 years they have roamed wild and undisturbed. Studies have shown the herd regulate their own fertility and are not at all overpopulated. In fact, their population rate has been proven to be only 3%. PLEASE do the RIGHT thing by protecting these beautiful, peaceful horses and allowing them to remain wild and free in the only habitat they've ever known. We've destroyed so much on this planet already; Let the Heber herd be an exception. We simply HAVE to do better, and NOW. Decide with your heart.

Sincerely,

Melissa Hollen
