Comments: I totally disagree with the proposed round up and/or sterilization of the wild horses that is being proposed. I feel this this a hold should be put on these proposals until the criteria should be re-examined when studies can be made with the welfare of these horses in mind. Not because cattle and sheep ranchers need more cheap leases for grazing. This beautiful horses are healthy and happy living their lives running free. These lands belong to all of us. I vote for freedom. They have been here for many many years and should be allowed to continue.
