Comments: One thing I forgot to mention: Let's please resolve this issue so the rest of the Apache-Sitgreaves Forest can get on with other critical issues that it faces. This has lasted so many years and has caused many worthwhile projects to hit a log jam. If you do go ahead with a designated area, hold fast to the size and use the good range management techniques your range staff knows well to dictate yearly actions, not protests and form letters. You have talented people working for you. Let them do their job.
Thank you again.
