Comments: Hello,

I am writing in regards to KORE Mining's request to do exploratory drilling for gold along Forest Service road 3S307 (aka Claypit Cutoff) off of Antelope Springs Road at the Hot Creek end. The Greater Sage Grouse are in decline across the west, and while the Bi-state Sage Grouse are stable, the Bi-state Sage Grouse in Long Valley are in decline. This project is likely to negatively impact them. I implore that you please impose mitigations to minimize the impacts.

Thank you for your time,

Kristina
