Comments: To whom it may concern:

I write this message to voice my opposition in the proposed mining efforts near Hot Creek outside of Mammoth Lakes, Ca. This proposed location will have detrimental and irreversible damages that may be too much to recover from. Please reconsider this location as many anglers world-wide look at Hot Creek as a staple of the Eastern Sierra trout waters. This would be a selfish decision to potentially destroy a world renowned fishery that many generations have enjoyed for mining purposes.

Thank you,

Nate Moylan
