Title:

Comments: I support the upgrades the composting toilets at Hermit Lake. An extreme waste to fly out human waste via helicopter and the instances of liquified human waste leaking is unacceptable. The hermit lake area suffers from overuse. Instead of replacing the 4 walked shelters with tent platforms. I would rather see the alternative 1 implemented with winterized cabins which are safer and can charge more \$ that could be used to help with upkeep. I've gone to Baxter state park in Maine in the winter and their cabins are perfect examples of what you should add at hermit lake. Replacing with tent platforms is not the answer.

I also support the additional mountain bike and skin track trail proposed to increase recreation in other areas besides hermit lake as well.
