Comments: In Mammoth lakes our entire economy is based on our environmental resources fisherman, sightseers, birdwatchers and more are make up the majority of our towns income in the summertime and they visit mammoth to experience places like hot creek. To threaten any of this places with the possibility of permanently alter it, is to threaten the livelihood of mammoth lakes it's self. I oppose the proposed mining because my job as a flyfishing guide is reliant on hot creek and other fisheries to remain healthy.
