Title:

Comments: Please do not ruin this popular area for local wildlife/recreation. Though I do not live in Mammoth this is one area I visit whenever I am in the area. It brings visitors and dollars to the area and needs to be preserved for future generations. The profits for the mining company will not support the local economy in the same way. It is a short sighted plan that only benefits a few. The damage done to the area will impact the local community for hundreds of years
