First name: Theran

Last name: Mills

Organization:

Title:

Comments: Do not allow any mining that might in any way endanger fisheries. Any elected officials that do not oppose this need to be removed from their position in the next election. Any state or federal employees need to be removed from their position if they don't oppose this. If elected officials don't fight for that employees removal, then they need to be removed at the next election

This is a serious breach of contract with the public and our natural places. This should not be allowed in any way shape or form.
