Comments: Dear Ms. Garcia,

I am writing to share that I strongly oppose the Long Valley Exploration Drilling Project proposed by Kore USA Ltd. (Kore Mining). The proposed mining project threatens the future of the scenic, economically and ecologically important Long Valley area in Mono County.

I am particularly concerned about the proposed project's proximity to Hot Creek, one of the region's iconic fisheries. Though this project is only exploratory for now, as a CalTrout supporter, I am all too aware of the grave impacts mining can have on fish and freshwater ecosystems. Mining operations can lead to a variety of contamination when rainwater or surface drainage carries contaminants to nearby streams, rivers, lakes, and groundwater, thus harming species who rely on these water sources. Not only is this proposed project just above Hot Creek, but the water from Hot Creek eventually flows into both the Owens River and Crowley Lake, putting this entire ecosystem at risk.

Right now, the need to restore ecosystems rather than degrade them is urgent. California appears to be entering into another extreme drought, another extreme fire season, and is aiming to protect 30% of our lands by 2030. In this context, it is completely inappropriate to approve projects like this that are very likely to cause further risk to our natural resources.

Therefore, I strongly oppose even the first exploratory step of this effort to ultimately mine for gold. At a minimum, a full EIS should be conducted in order to properly assess the potential impacts and allow for meaningful public engagement.

Sincerely,
