Comments: To Whom it may Concern:

I have lived in the High Sierra for more than 40 years. I have an investment of time, energy and finances as well as dear friendships here. I have watched other projects that involve mining cause large impacts on the life and ecology where it was centered. I Oppose categorical exclusion for this project. Why would Kore mining be excluded from an environmental assessment? They should be subject to the same reporting as anyone in Inyo/Mono county requesting entrance. Please hear our plea before it's devastated our land beyond repair. Thank you.
