Comments:

As a resident of Bishop for the last 20 years and visitor to the east side of the Sierra for the last 40 years, I feel compelled to voice my strong and categorical opposition to the Long valley exploration drilling project #59294. This is one of the most scenic places in the world and it deserves to be protected .

In any case, an environmental assessment needs to be completed before any decision or action is taken.

Thank you for your time, respectfully

Paola Accusani
