Title:

Comments: My family has lived in mammoth for 32 years and we have been local business owners for 23 years. I learned how to fish at hot creek when I was 3 years old and to this day i go to fish, walk my dog, clear my head etc.

I know hundreds if not thousands of people also cherish this space for those reasons and many more.

This region has changed a lot over the years but to desecrate this sacred land all in search of precious metals is not acceptable. Also please consider the environmental impact it would cause to a very delicate ecosystem. A foreign mining company or nobody for that matter should be allowed to tear that ground up.

Thanks for your time
