Title:

Comments: Although I live in Orange County, my family and I spend a great deal of time in the Inyo/Mono area. I consider it our second home, and it is of supreme importance to me that it be preserved in its present state.

We CANNOT have drill pads, access roads, loud noises, interruptions of the cycles of animal life in this area, let alone what ight follow if indeed gold is discovered in any quantity.

This attempt to place private greed over public welfare and preservation CANNOT be permitted.
