Title:

Comments: I strongly oppose this project, In addition to impacts on human health from dust, flood lights at night and noise, it will have a detrimental effect on the local tourist-based economy, pose risks to Hot Creek from intercepting, and disturb wildlife such as Sage Grouse and Mule Deer. I worry that it will pollute the ground water. I oppose the categorical exclusion for this project and feel strongly that Kore Mining should provide an environmental assessment. Thank you for considering my comments.
