Comments: Why does our own Forest Service Management team think that citizens of Ca. now want to have Gold mining or any mining done in one of the most respected areas where we recreate? I think the greatest amount of gold is already being mined each year with very little disturbance to the land. Think about Skiing dollars, and my desire to spend my fishing gold dollars the last 50 years buying a fishing license, hotel rentals, food supplies and everything else needed for a vacation anywhere near mammoth Ca.. Another worry for those who live in that area as well as those miles away. What might happen to your Air Quality and Noise Quality? Let alone the water quality that finds its way to the real gold mine Los Angeles. The Air might not reach us but real trouble will if the water becomes tainted from mining products after an Ok is given for Long Valley exploration #59294.
