Comments: Hi, I'm an outdoorsman who frequently goes to the Long Valley area for recreation. The proposed mine is worrying to me as a fisherman specifically, the Hot Creek is a very sensitive waterway that will be impacted by any mining around it. The proposition is very vague and isn't well thought out. While mining must be done to continue forward progress for humanity, this isn't the place. Gold mining has come leaps and bounds to the point where we can extract it where pure ore doesn't even exist, our natural wonders should be spared when we can get it elsewhere.
