First name: Vic

Last name: Redding

Organization:

Title:

Comments: To Whom It May Concern - I am registering my opposition to this project. There is not sufficient information contained in the proposed scope to approve it to move forward as submitted, and should require a full EIS before any work takes place. This area is simply too fragile for blind exploration. The EIS must also address other activities (such as recreation and non-commercial fishing access) as well as a plan to restore the area to its original condition. Until those are documented, please reject this proposal. Vic Redding
