First name: BryAnna

Last name: Vaughan

Organization:

Title:

Comments: This area has already had its resources highly compromised by exporting water for over 100 years. The local economics are driven by recreational tourism. Any more devastation to the local environment will further destroy the local economy. No more exports, no more mines. The resources of the Eastern Sierra are for everyone to enjoy, but they should not be for sale, to any one or any corporation. No more!
