Comments: Kore Mining Long Valley Exploration & Heap Leach Mining Proposal
5/11/21

This commentary pertains to Long Valley Drilling Exploration Project #59294.

I am a previous resident of the mammoth lakes area and I would like to oppose the mining project rights. The devastation that this would cause to the area through toxic chemicals and excavation far outweigh any benefits that the mining would provide. This area is a treasured resource and recreation area to so many and a vital natural habitat. Please do not let the greed of a few ruin this important ecological area.
