Comments: Hello,

I am a native Californian. Since childhood the Western and Eastern Sierras have been a place to go and enjoy nature. These lands are California's most awe inspiring places. We are fortunate to have these places to go hiking, camping and fishing. For our's and future generations, we have to preserve these lands. Drilling is not preservation and in no way can it be beneficial to the area, particularly Hot Creek.

Please do not allow this to take place.

Thank you for your time.
