Comments: hello thank you for your work. i want to voice TOTAL OPPOSITION TO THIS DRILLNG PROJECT!!!
not only would our tourism industry be very negatively impacted, but the leaching of toxins into owens river
& crowley lake would damage fishing & other wildlife, plus well water downriver where i live, &
water supplied to all the way to los angeles. please let me know if there are any steps us local homeowners with
wells can take to further the cause of not letting this very bad idea come to fruition in our beautiful treasured land.
thank you for allowing me to voice my opinion ... keep the faith
