First name: James

Last name: Honey

Organization:

Title:

Comments: I am completely opposed to this project. These drilling projects are disastrous to the environments they take place in; poisoning the land, water, plants, and wildlife. The destruction of this fragile habitat will do reprehensible damage to the aesthetics, and vitality that bring so many people to our beautiful home. Please do not allow our natural resources to be exploited for gain in the short-term, and sacrificed of the health and longevity of our home for future generations.
