Comments: 1st - WOW! This is a big project and has many great well thought out features. Thanks for working on this.

I represent one of your shuttle companies.

- We would like to have a place to drop MRT bikers off near Blue Pool / Trailbridge Reservoir - for those who can't do the entire trail for whatever reason. This is the 2nd most used drop off for bikers. Please continue to have options for us.

- We would be willing to run a shuttle for blue pool during certain days/hours provided the scenario made it financially feasible for us to do so.

- Shuttle drivers should be able to get some type of access to internet to stay in touch with office and forest service/emergency personnel. We do a lot of emergency support for stranded tourists. It will be critical to us helping to manage the visitors in a positive and efficient way. We might be open to paying a small fee for the ability to access the system if that would make a difference.

On a side note:

- Are you going to charge for parking? I do think that is a good idea - at least during from June - September. This may limit some peak traffic - it would also encourage visitors to come off season. (Parking fees/dates can be adjusted based on how heavy use is.)

-
