Title:

Comments: First Site #19 Quartzville. This is our main access for the Hallelujah Mine claim. The boulders are somewhat fine where they are now. Would like to see tent camping area just out side of boulders for when the Claim owners have an outing. would like to expand opening to road for better access of claim owners motorhome. would like to gate off and have the area only accessible to BLM,USFS,ODF, Sweet Home Fire and Claim owners having locks on gate. Per Exclusive Access of in Public Interest 75 IBLA 153 (1983). I am also one of the claim owners on the site#23 Galena. If the boulders are placed at the point of where the are located in the drawing this would not grant access to the claim owner for their motorhome and equipment. the boulders nee to be placed at the rivers edge. as before I can not do a map and download to site. Would like to do a gate to limit access to BLM,USFS,ODF, Sweet Home Fire and Claim owners having their own locks for access. I have read up on the mineral Laws that pertain to this using the sixth edition book. please give me a call for any questions
