Comments: Most all UTV's that are sold and are seen out in the woods are greater >50" and with no enforcement, these <50" trails get poached by the bigger vehicles. Singletrack trails need to stay at a size that makes them inaccessible by anything else. You can find trails all over the panhandle that are being used illegally by UTV's if the machine can somewhat fit then it's considered open to them. Kelly humps, Tanks traps, barricades do not stop them. Keeping the trails narrow enough for motorcycles and Mtn bikes is the best deterrent.
