Dear Ranger Davalos,

Thank you for sending me the email inviting me to submit scoping comments on your proposed Devils Hens Nest Vegetation Project.

Your May 19 "Dear Interested Party" letter does not contain specific information about the project. The Proposed Action section of the letter does not contain any information about proposed commercial harvest acres.

I encourage you to use prescribed fire. You say you need to control and prevent the proliferation of non-native invasive plant species. Please do not apply herbicides that contain the cancer-causing chemical glyphosate.

Sincerely,
